

## DIMONTONATE FLOCCATI S.p.A. ENLARGES ITS FLOCK PRODUCTION PLANTS AIMED FOR VACUUMFORMING .

### BETTER DELIVERY TIMES AND BIGGER FLEXIBILITY FOR THE CUSTOMERS

*Montonate, July 12, 2018* - DIMONTONATE Floccati S.p.A. is pleased to inform to have signed an important agreement with two consolidated European flocking Companies for flocked thermoforming materials : ICMA S.R.L. in Italy and LIMSA CORPO S.L. in Spain .

In the last years the Dimontonate Floccati's market has had a huge increase, both in Europe and in North America, where the Company opened a new plant in 2016 .

In order to guarantee production capacity for all flocked products and markets this agreement with ICMA and LIMSA results to be very strategic. With the introduction of **3 production plants in Europe** DIMONTONATE Floccati S.p.A. will offer to its customers better delivery times and more flexibility in consignments by maintaining a high standard quality and the warranty of the products , which has made the Company a market leader in the production of flocked materials for more than 40 years .

The raw materials used will come from the same European suppliers already approved by DIMONTONATE Floccati.

The production management of the thermoforming products in ICMA's and LIMSA' s plants will be always under the direct control of DIMONTONATE, thus assuring the same technical specifications of its product and by following the same strict control methods applied by DIMONTONATE , who has stood out over the years for the high quality and timely service for full customer's satisfaction.

Commercial and accounting relationships will be always managed by DIMONTONATE Floccati S.p.A.

The finished product will be sent to the customer directly from the production site.

Our sales staff will soon contact your company representative to better explain the benefits of this important agreement.
